Music Memory

Music Memory is a very special program that allows kids to listen and study classical music. For example, when I started music memory, it was the first time I ever heard classical music and it sounded great. The music pieces had a variety of notes that follow a certain pattern. For example, in "The Hall of the Mountain King," the music repeats but gets faster.

Other classes should also have music memory because it helps students learn more about music. I think that music can help students think because it can help them concentrate.

* Music Memory

Music Memory is a great opportunity for kids to understand music and the history behind it. Music Memory teaches kids about music and details about that piece. It teaches kids to appreciate music and enjoy it.

Music Memory makes me realize that music is one of the most important things in life. Music is everything! Since Music Memory gives us teams, kids can have a chance to work together. Being part of Music Memory takes life to a whole new level.

Music Memory makes kids understand that life is not just win and games. Life's about learning, understanding life, and learning new stuff. For example, this program has given me a chance to explore the world and understand music more in depth. I love Music Memory and I hope it can continue for years to come!

I was in the audience. Before I had never heard classical music. Now, I have heard classical music. Before, I didn't appreciate music at all. After music memory, I have learned to appreciate music. The orchestra was truly amazing. I wish to go again but I can't go.

PS 105 My Music Memory Experience Esther Mei

Class 5-9

6/3/13

My music Memory experience was amazing. I was so excited to be in the Music Memory team. It was awesome, challenging, and exciting all at the same time! It was really cool to have classical music to listen to everyday, especially because of the English Folk Song Suite and the Romeo & Juliet. Since I am to read Romeo & Juliet in the future, it is good to get familiar with it. Thank you for letting me participate in Music Memory!

We went to Music Memory for competing with other schools. It was a really big place at the Skirball center. We worked hard to win but we only got a silver ribbon. But before that, a woman introduced us to Music Memory. She explained about the man who restored music memory again. It was once taught to him but was forgotten. That man was her dad.

It affects me as a student that to memorize and remember things. Music Memory is a program to memorize the pieces of music and exercise your brain. It makes you feel relaxed, too.

My experience to go to the Skirball center for the contest has taught me a lot. It was really special for me to go because only a few students went. The two classes, us and the fifth grade were competing but we got a 90%. But the audience cheered for us. I recommend this to people who have a hard time remembering things.

During the school year, we have been taught by our teacher, Ms. Berger Music Memory. Learning music memory and memorizing the classical music was a journey to a new world of music from the people who developed this and other countries.

When I found out that I was in the team I was so excited because the whole year my classmates and I have been studying and taking tests so that we could be a part of the team. We wanted to bring music back so that people would not stop listening to classical.

Music Memory was created so that people would listen to and enjoy the classical music that came from different places and periods of time. It was also made for those who want a challenge. I think it was very fun for my class and I hope I get picked next year.

Music Memory

Entering the Music Memory is a huge honor. It shows that you practice the pieces whenever you had time. That is exactly what I did and I made it into the team. I feel great being in the team.

Learning music and memorizing it helps me prepare for this year's music memory, and next year's. Music memory is created for people who enjoys classical music and listens to it. Music memory comes in teams so it gives us a chance to work together.

Some of the music from the 16 pieces was fun like this year's jazz piece: It Don't mean a thing if it ain't got that Swing. I hope I will get picked for next year's music memory.

The Music Memory Program gave me a chance to learn more about classical music. It opened me up to the world of classical music. I even got to learn about an interesting jazz piece: "It Don't Mean A Thing If It Ain't Got That Swing" By Duke Ellington. My friend, Man Ting, said, "This program expanded my knowledge of classical music and I became more interested in the music." The music was calm and enjoyable and I loved it. I strongly agree with my friend, Man Ting, that the Music Memory Program helped has expanded my knowledge on classical music.

Music Memory Reflection

Music Memory had helped me a lot! I've never knew about ^{such} great music without singing but this program helped me to learn about them. I've never even heard of jazz music before I studied Music Memory. In fact, I never even knew there was such thing as composers! Thankfully, Music Memory helped me learn all this about music.
